

HELPS TO PRODUCE...

...PERFECT FLOORS

Elastilon® is highly recommended with great benefits & features

- No Nails – No Glue.
- Over 97% of Elastilon® users would use it again and recommend to a friend.
- Can be installed over particle board – wood subfloors – Gypcrete – concrete – ceramic – vinyl tiles and sheeting.
- No messy glue clean ups.
- No VOC's.
- In conjunction with a 6mil poly plastic – eliminates cupping & moisture failure over concrete.
- In conjunction with a 150mic DPC – for use on or below grade.
- Tested for sound reduction above and below (IIC-62 & STC-54).
- Can be used with in-floor radiant heating up to 26°Celsius.
- No glue is the T&G, means repair work, like change a plank can be done.
- One can sand & finish floors installed on Elastilon®.
- Soft underfoot.
- Great shock absorption system for home gyms with Elastilon® Sport.
- Suitable for residential or commercial use.
- Great for DIY as well as professional installers.
- The Elastilon® system is a proven method of installation over 26 years through 30 countries.

Your Wooden Floor Installed Easy As 1, 2, 3
