

COMOLAY IXPE

REVOLUTIONARY UNDERLAY FOR FLOATING FLOORS

COMOLAY IXPE underlay is a premium acoustic underlay crafted from a 3mm layer of high-performance, sound-dampening Irradiated Cross-Linked Polyethylene (IXPE) extra fine foam. It features an 100 micron HDPE (High Density Polyethylene) overlapping vapor barrier, providing additional moisture protection at the joints.

Installation is a breeze thanks to the self adhesive tape that secures the overlap effortlessly.

Material

IXPE (Irradiated Cross-Linked Polyethylene) acoustic underlay

Type

IXPE underlay complete with 100 micron HDPE moisture membrane

Dimensions

3mm Thickness, Roll width 1.08m (includes overlap of 80mm), Roll length 10m

Features

- Environmentally Friendly
- Sound absorption and increased acoustic properties
- Cushioning
- Moisture and mold resistant
- Non-absorbent and rot resistant
- Easy to install with self adhesive tape
- Enhanced floor covering lifespan
- Excellent Rebound Properties
- Increased Thermal Properties - energy saving
- Anti-Static
- Anti-Allergenic – resistance to bacteria and dust mites
